**Subject:** Definition of Rural Used by FirstNet  
**Date:** Thursday, April 26, 2018 1:23:11 PM

---

Charlotte Whitacre shared the below definition of "rural" to assist us in targeting our data call. Please let Steve and me know if there are any concerns with using this definition.

## FINAL DEFINITION OF "RURAL"

11. FirstNet defines "rural," for the purposes of the Act, as having the same meaning as "rural area" in Section 601(b)(3) of the Rural Electrification Act of 1936, as amended ("Rural Electrification Act"). Section 601(b)(3) of the Rural Electrification Act provides that "[t]he term 'rural area' means any area other than—(i) an area described in clause (i) or (ii) of Section 1991(a)(13)(A) of this title [section 343(a)(13)(A) of the Consolidated Farm and Rural Development Act]; and (ii) a city, town, or incorporated area that has a population of greater than 20,000 inhabitants." In turn, the relevant portion of Section 343(a)(13)(A) of the Consolidated Farm and Rural Development Act explains that the "terms 'rural' and 'rural area' mean any area other than—(i) a city or town that has a population of greater than 50,000 inhabitants; and (ii) any urbanized area contiguous and adjacent to a city or town described in clause (i)." Thus, as defined herein, the term "rural" means any area that is *not*:

- A city, town, or incorporated area that has a population of greater than 20,000 inhabitants
- any urbanized area contiguous and adjacent to a city or town that has a population of greater than 50,000 inhabitants

12. FirstNet concludes that a lower boundary (*e.g.*, "wilderness," "frontier") is not necessary to satisfy its rural coverage requirements under the Act, and thus FirstNet does *not* intend to establish any such boundary.

---

Good afternoon.

As a follow up to last week's Leveraging Federal Assets (LFA) meeting, we are setting up the LFA survey using Qualtrics, an online survey software. Now we need your assistance in identifying the personnel who will be answering the LFA survey questions for your agency.

To ensure that our communications about access to the survey are targeted appropriately, we ask that you provide the names and e-mail addresses for your agency to [michael.radney@gsa.gov](mailto:michael.radney@gsa.gov) by 4:00 pm on June 14. Please note that if you are unable to provide all of your email addresses by the deadline, we can make additions later. Also, only email addresses for federal agencies (i.e., ending in .gov or .mils) can be accepted. Personal email addresses cannot be used.

As mentioned, our main focus for the survey will be DOI, DOD, GSA, USDA, NASA, DOE and VA, but all agencies are encouraged to participate. We want maximum participation.

I've attached a copy of our LFA contact list for your reference. Thank you in advance for helping us identify the appropriate subject matter experts for the survey.

Thank you.

# BROADBAND INTERAGENCY WORKING GROUP

<b>Work Stream</b>	Leveraging Federal Assets for Broadband Deployment
<b>Week of</b>	May 17, 2018
<b>Recent Progress</b>	<ul style="list-style-type: none"> <li>Meetings were held on May 3, May 10 and May 17. Representatives from Commerce/NTIA, DOE, EPA, GSA, DHS, NASA, VA, and DOI/BLM attended the May 3 meeting, while representatives from USDA, Commerce/NTIA, DOE, GSA, DHS, HUD, NASA, VA and DOI/NPS attended the May 10 meeting. May 17: USDA, Commerce/NTIA, OMB, EPA, DHS, HUD, DOI/BLM, NASA. The four proposed objectives developed for LFA are (1) identify and build an inventory with geo-location data of building classes/categories and other types of assets that are potentially available for public and/or commercial use to support broadband deployment. (2) For each type of asset, identify the laws, regulations, and/or policies that govern the public and/or commercial use of those assets; (3) If laws, regulations and/or policies are identified that inhibit the use of federal assets for public and/or commercial use, develop recommendations to address the barriers; and (4) Create a streamlined, standardized process to make the assets identified available to public and/or commercial providers, where applicable and not already addressed by the Federal Permitting work stream.</li> <li>Future meetings will be every Thursday 1:00 – 2:00 PM</li> </ul>
<b>Next Steps</b>	<ul style="list-style-type: none"> <li>Continue to reach out to agencies to ensure more active participation.</li> <li>Review and provide feedback on the survey questions.</li> <li>Discuss Objective #1 requiring the creation of an inventory with geo-location data with the NTIA/BIWG leadership team.</li> <li>Share proposed work plan with the NTIA executive leadership team.</li> <li>Next meeting: May 24, 2018.</li> </ul>
<b>Issues/Risks (Mitigation Plans)</b>	<ul style="list-style-type: none"> <li>The Omnibus requires GSA seek public comment on additional data that should be collected in the Federal Real Property Profile. Section 608(a) describes the data point as “the ability of the federal real property to support a communications facility installation.” We need to resolve any differences in expectations relative to Objective #1.</li> </ul>
<b>Questions or requests for Executive Leadership Team</b>	<ul style="list-style-type: none"> <li>Please identify what the Administration would consider a success for the LFA working group to achieve now in terms of Objective #1.</li> <li>We will be sharing the revised survey questions for your feedback and input.</li> </ul>

## **Proposal to Address Objective #1 for the Leveraging Federal Assets Working Group**

### **Initial Inventory Information**

The Leveraging Federal Assets (LFA) co-chairs propose utilizing the DOI's inventory information as a preliminary step toward data to identify real property assets that are used or could potentially be used for broadband infrastructure and be geospatially displayed.

USDA's Forest Service is also believed to have readily available data on real property assets that are used or could potentially be used for broadband infrastructure. It's believed that the DOI and USDA inventories cover the vast amount of data available from federal civilian agencies. In the process of collecting data to identify real property assets that are used or could potentially be used for broadband infrastructure, a primary goal of the LFA working group is to ensure that the data collected from agencies is an accurate representation of the inventory. The working group should use the information that is readily available from DOI and USDA to pilot test the information that all agencies will need to report on their real property assets.

### **Use of the Survey Inputs**

The survey questions the LFA working group has developed are structured in a way to collect preliminary information from agencies about their assets as well as detailed information about their policies. The survey questions also set the stage for completion of the other objectives the LFA working group must achieve.

We envision a thorough collaborative process with subject matter experts from the federal real property and communication sectors to review the survey results and any public comments received from GSA's Federal Register notice per section 608 of the MOBILE NOW Act. This review and analysis will lead to a comprehensive guidance document that agencies will use to submit information between October 2018 and January 2019 concerning real property assets that are used or could potentially be used for broadband infrastructure.

### **Cons of a Detailed Data Call at this Time**

We do not believe it would be advantageous to ask agencies for detailed level data on specific assets at this time for the following reasons:

- We have not mapped out any detailed guidance on what data we are asking agencies to report regarding their real property assets at this time. In accordance with the schedule set in the MOBILE NOW Act, GSA is scheduled to complete the guidance for reporting by October 2018. Rushing through this process now will likely result in inaccurate and unuseful data.
- GSA, within the next several months, will collect data from all executive agencies at two different points:
  - December 15, 2018 - the regular cycle of FRPP data reporting
  - October 2018 - January 2019 - reporting regarding the installation of broadband infrastructure on federal real property

- Launching a data call this summer for detailed level asset information would add a third data call on top of the two that are mandated by statute, creating a strain on agency resources which would have to supply this information. This also creates a great risk for inferior data quality or accuracy.

## Leveraging Federal Assets for the Deployment of Broadband Working Group

### Revised Survey Questions – May 18, 2018

1. Please provide the following information for the person(s) completing the data call: agency name, bureau/division, e-mail and phone number.
2. What types of real property assets does your agency own?

Choose from among the following:

Real Property Assets	Description
Building	Building that could accommodate a rooftop or side antennae installation
Land	Federally-owned land
Structures	
Water Tower	Water Tower suitable for broadband infrastructure
Communications Tower	Communications or radio tower suitable for broadband infrastructure
Transmission Infrastructure	Communications or electrical transmission infrastructure, such as aerial transmission poles, towers, or cables or buried conduit/duct/micro-duct
Rights-of-Way (ROW) or Easements	Existing ROW or Easements suitable for broadband infrastructure
Water, Road, and Rail Crossings	Existing water (stream, river, canal, etc), road, and rail crossings that can accommodate broadband infrastructure

3. What types of real property assets in your owned inventory currently have broadband infrastructure installed on them? What types of real property assets could potentially be used to deploy broadband infrastructure?
4. What laws, regulations and policies facilitate the use of your agency's real property assets for the deployment of public and/or commercial broadband infrastructure?
5. What laws, regulations and policies hinder or constrain the use of your agency's real property assets for the deployment of public and/or commercial broadband infrastructure?
6. For those real property assets that do not currently have broadband infrastructure installed, are there any specific policy or regulation changes that your agency could make or would like to see made that would allow/facilitate their potential use?
7. List any other restrictions on the use of your real property assets for broadband infrastructure and the types of real property assets affected.
8. If requested, can your agency quickly and easily compile geospatial and inventory information for your agency's real property assets that currently support broadband infrastructure? If not easily assembled, how long do you estimate it would take to compile the data if provided a template?
9. If requested, can your agency quickly and easily compile geospatial and inventory information for your agency's real property assets that could potentially support broadband

infrastructure? If not easily assembled, how long do you estimate it would take to compile the data if provided a template?

10. Who is the primary contact for information about your agency's real property assets?
11. Are there any national security implications to the public disclosure of information about your agency's or regulations relating to broadband facilities? If yes, please explain.
12. Are there national security concerns or policies that would prohibit making information about your agency's real property assets accessible by the public? If yes, please explain.

  - Bureau of Indian Affairs
  - National Park Service
  - Bureau of Reclamation
  - United States Geological Survey
  - Fish and Wildlife Service
- Department of Agriculture
- Department of Defense
- Department of Energy
- National Aeronautics and Space Administration
- Department of Veteran Affairs
- Department of Homeland Security

## Question 2 – Federal Real Property Assets

- 100% of agencies responded that they have buildings and structures in their owned or leased real property inventory
- 92% of agencies responded that they have land in their owned or leased real property inventory
  - The Bureau of Indian Affairs reported it does not have land

### Agency's Structure Inventory

## Question 3 – Additional Federal Real Property Assets

Agency	Assets
Department of Interior	
Bureau of Indian Affairs	Radio shelters
Bureau of Reclamation	Within its inventory of structures, is dams, power plants, pumping plants, canals, wells, drains, and recreation areas. Building inventory includes: offices, warehouses, laboratories, housing, industrial and shop buildings, and communications buildings that support the mission.
Department of Agriculture	Roads, dams and bridges.
Department of Defense	Bridges and Trestles; Parking Garages; Piers and Wharfs; Light/Utility/Equipment Poles; Observation Towers; Covered facilities other than buildings (e.g., covered maintenance or storage facility).
Department of Veteran Affairs	The National Cemetery Administration (NCA) provides burial and memorial benefits for Veterans and their eligible family members, and maintains national cemeteries as national shrines, sacred to the honor and memory of those interred or memorialized there. The NCA has plaques, monuments, flag poles, columbarium and historical artifacts.

## Question 4 – Assets That Currently Have Broadband Infrastructure Installed

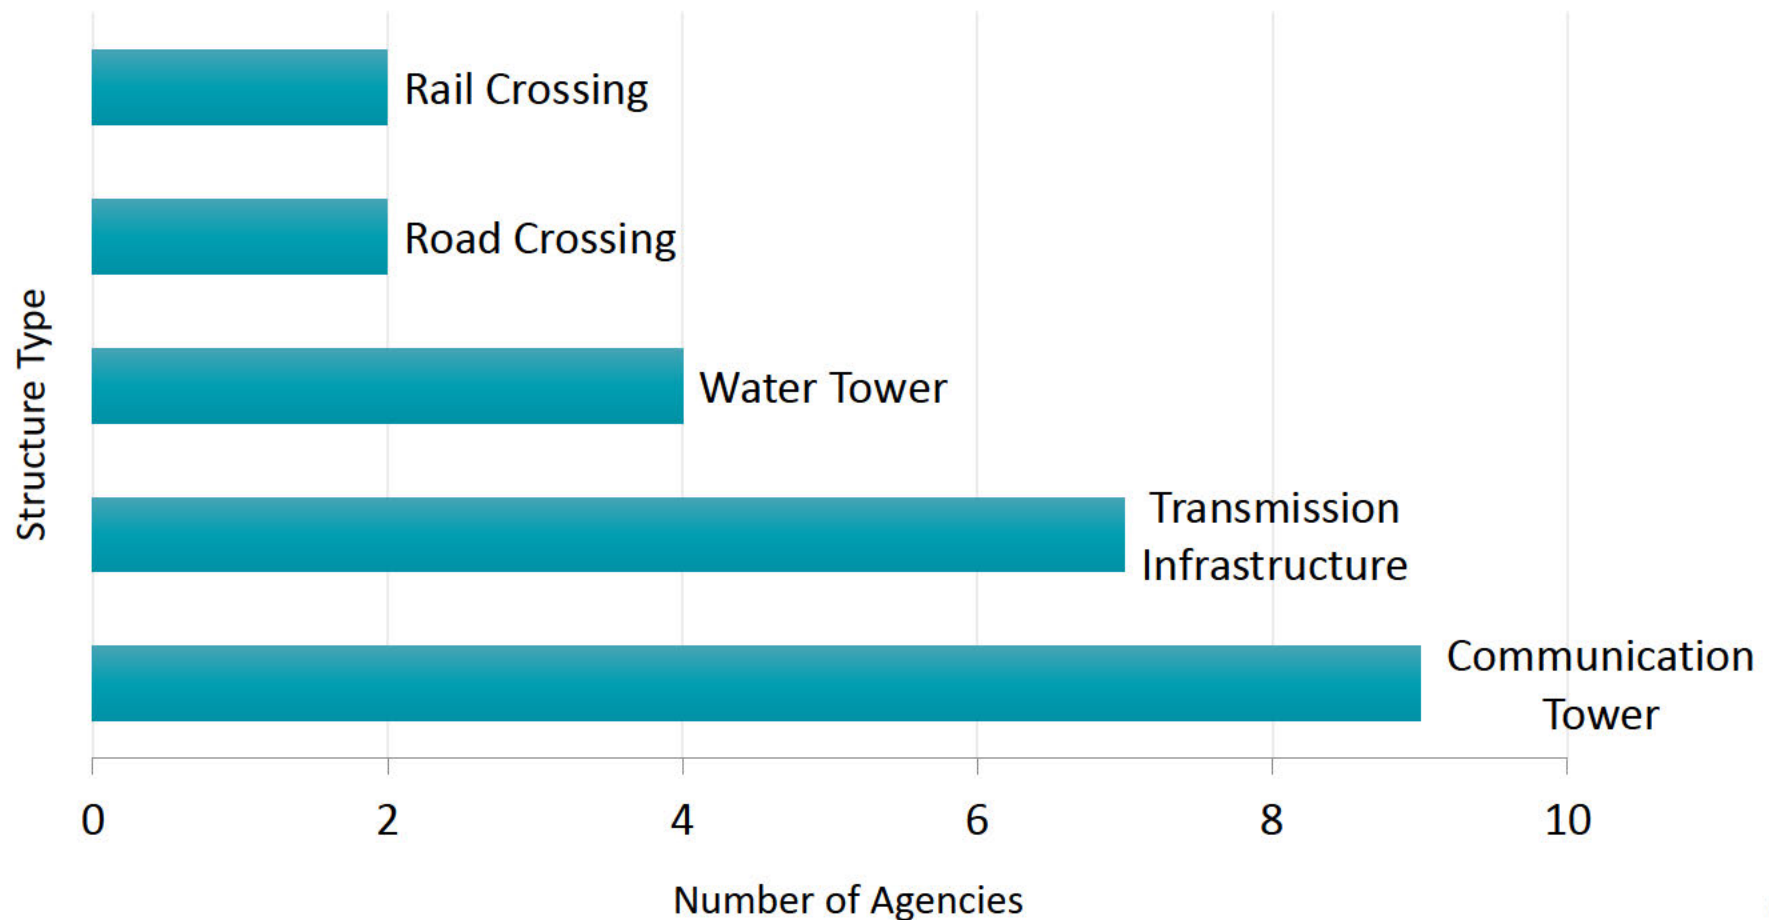

Agency	Buildings	Land	Structures
Department of Interior			
Bureau of Land Management	Yes	Yes	Yes
Bureau of Indian Affairs	Yes	No	Yes
National Park Service	Yes	Yes	Yes
Bureau of Reclamation	Yes	Yes	Yes
United States Geological Survey*	No	No	No
Fish and Wildlife Service*	No	No	No
General Services Administration	Yes	Yes	Yes
Department of Agriculture	Yes	Yes	Yes
Department of Defense	Yes	Yes	Yes
Department of Energy	No	Yes	No
National Aeronautics and Space Administration*	No	No	No
Department of Veteran Affairs	Yes	Yes	Yes
Department of Homeland Security	Yes	Yes	Yes

\* Indicates agencies responding they do NOT have *any assets* with broadband currently installed

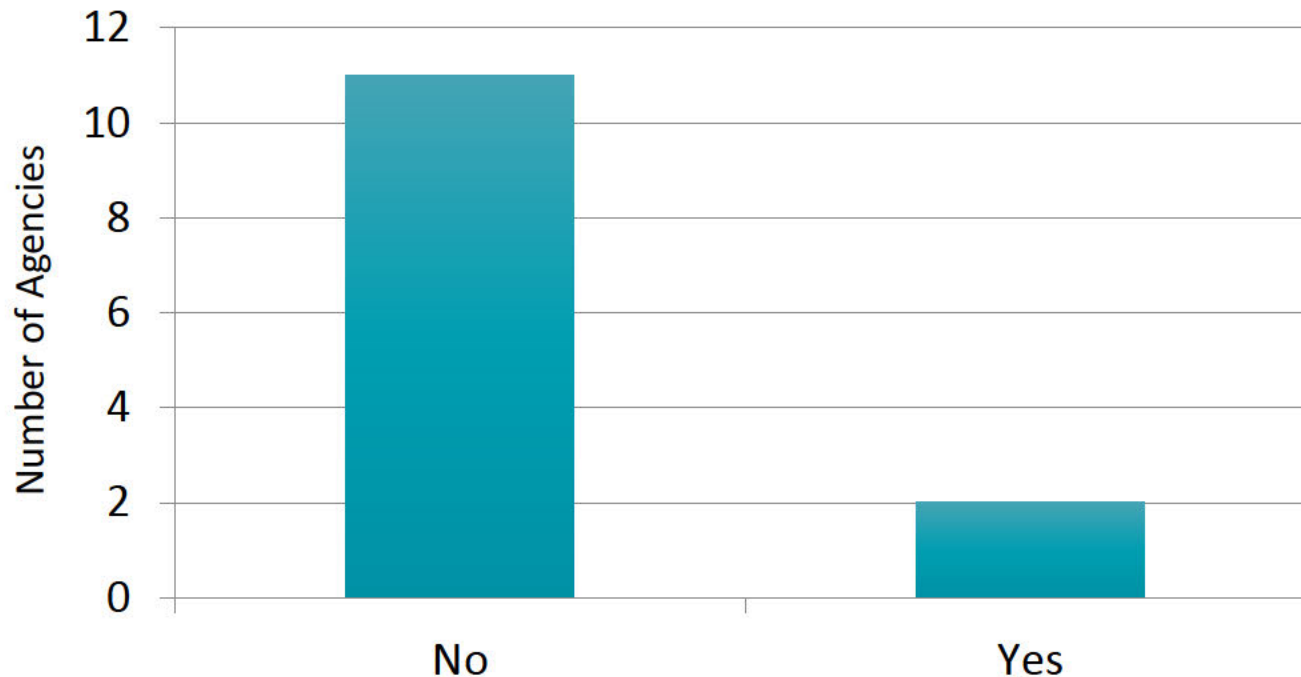

## Question 4 – Assets That Currently Have Broadband Infrastructure Installed - Continued

**Breakdown by Asset Type**

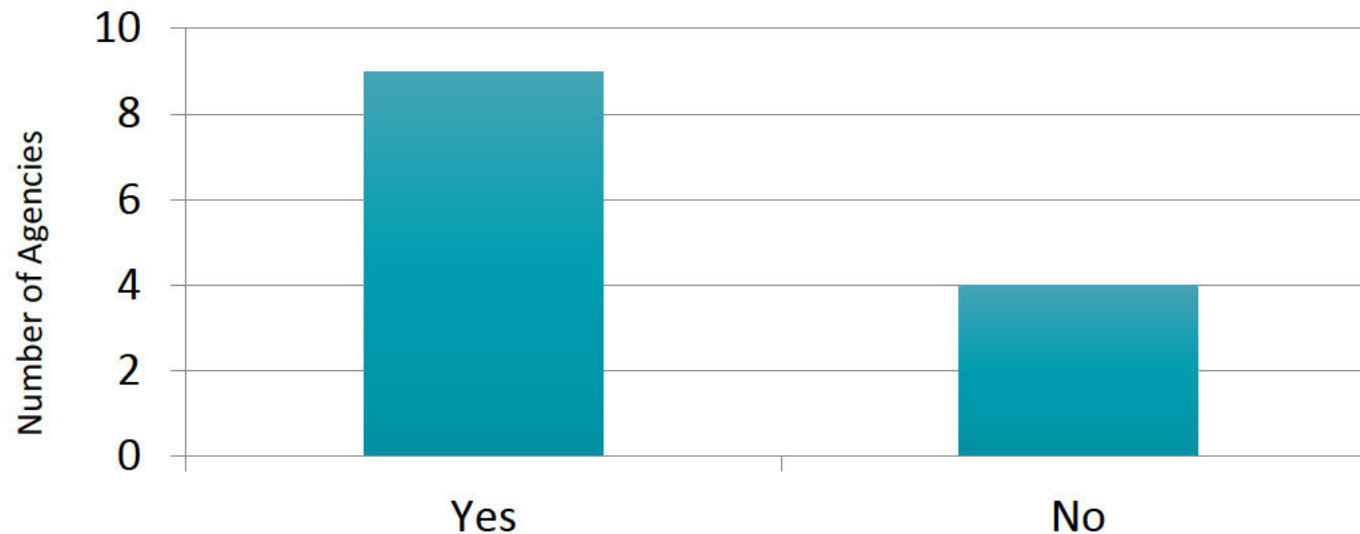

## Question 5 – Broadband Infrastructure Installed on Other Types of Real Property Assets

- Bureau of Indian Affairs – radio shelters
- Bureau of Reclamation – no specific structure type provided; authorizations for asset use is managed at the local area office/field office level so information is not readily available

## Question 6 – Real Property Assets That Could Potentially Accommodate Broadband Infrastructure

4 respondents stated they do NOT have assets that could *potentially accommodate* broadband:

- Department of Interior
  - Bureau of Indian Affairs
  - US Geological Survey
- Veterans Affairs
- Department of Homeland Security

## Question 7 – Easements or Rights-of-way Potentially Available for Broadband Infrastructure

Agencies that reported they do not have easements or rights-of-ways potentially available, include:

- Department of Interior
  - Bureau of Indian Affairs
  - National Park Service
  - United States Geological Survey
  - Fish and Wildlife Service
- Department of Energy
- National Aeronautics and Space Administration
- Department of Homeland Security

## Question 7 – Easements or Rights-of-way Potentially Available for Broadband Infrastructure (cont.)

Agencies that reported they have easements or rights-of-ways potentially available

Bureau / Agency	Easements / Right-of-Way
Department of Interior	
Bureau of Land Management	<ul style="list-style-type: none"> <li>• Rights-of-way corridors may be used for telephone and fiber optic.</li> <li>• Agency has management plans for many of its mountain tops with existing broadband.</li> </ul>
Bureau of Reclamation	<ul style="list-style-type: none"> <li>• Usually agency is not authorized to grant rights-of-way. However, may coordinate additional use for existing rights-of-way.</li> <li>• Local Reclamation offices are responsible for determining availability and compatibility for facilities under their jurisdiction.</li> </ul>
General Services Administration	<ul style="list-style-type: none"> <li>• Easement or right of way may be available as long as it is not in a high security building, nor interfere with existing antennas, wind, or solar projects.</li> </ul>
Department of Agriculture	<ul style="list-style-type: none"> <li>• Easements for road rights-of-way that may potentially accommodate broadband infrastructure.</li> </ul>
Department of Defense	<ul style="list-style-type: none"> <li>• Requester must provide specific requirements due to environmental and extensive operational and safety restrictions.</li> </ul>
Department of Veteran Affairs	<ul style="list-style-type: none"> <li>• Easements may be granted on a permanent or semi-permanent basis for VA facilities and land.</li> <li>• The Office of Construction and Facilities Management (CFM) is responsible for negotiating easement agreements.</li> </ul>

## Questions 8 & 9 – Laws, Regulations, and Policies That Impact Use of Property for Broadband

Agency / Bureau	Facilitate	Hinder or Constrain
Department of Interior		
Bureau of Land Management	1	1
National Park Service	5+	
Bureau of Reclamation	8+	
Federal Wildlife Service	3	2
General Services Administration	1	2
Department of Agriculture	10+	
Department of Defense	14+	
Department of Energy	3	
National Aeronautics and Space Administration	1	
Department of Veteran Affairs	8+	
Department of Homeland Security	1	

+ Indicates they identified additional areas to research but did not list a specific law, regulation or policy

## Questions 10 & 11 – Law, Regulation, and Policy Changes; and Other Restrictions That Limit Use

- Responses to question 10 - are there any specific policy or regulation changes that would allow/facilitate asset use – can be broken into three categories:
  - No/none identified
  - Sufficient policies and regulations exist to facilitate broadband infrastructure installation
  - 1 agency was unsure
- Responses to question 11 - 2 agencies did not respond, 4 agencies responded that there were no other restrictions that limited use. The other restrictions noted are listed below.

Agency	Other Restrictions
Department of Interior	
Bureau of Indian Affairs	Tower evaluations, lack of room/space, Funding to implement the corrective actions identified in the (RI CASHE) inspections
National Park Service	Depends on the resources that the NPS was designated to protect
Bureau of Reclamation	If it does not conflict with project purposes; assets are in security zones, on critical infrastructure, or are adjacent to project purpose delivery of water or power generation
Fish and Wildlife Service	Adequate size and height
Department of Veteran Affairs	Specific requirements to share space; VA and Federal Historic Preservation Law and regulation; special telecommunications system design requirements
Department of Homeland Security	This varies by components. However DHS operations require secure communications

## Questions 12 & 13 – Quick (within 90 days) Inventory Availability and Geospatial Information

Agency / Bureau	90-day Inventory Current Broadband Infrastructure	Estimate to Compile	Geospatial Data – for Assets Exists
General Services Administration	Yes		Yes
National Aeronautics and Space Administration	Yes		Yes
Department of Interior			
Bureau of Land Management	Yes		Yes
Bureau of Reclamation	Yes		Yes
US Geological Survey	Yes		Yes
Fish and Wildlife Service	Yes		Yes
Bureau of Indian Affairs	Yes		No
National Park Service	No	1 Year	No
Department of Agriculture	No	Minimum 120 days	No
Department of Defense	No	Unknown	No
Department of Energy	No	Unknown	No
Department of Veteran Affairs	No	Minimum 120 days	No
Department of Homeland Security	No	Minimum 8 months	No

## Question 15 – Agencies That Have Information About the Process to Access Real Property for Broadband

Agency / Bureau	Public Information Available
General Services Administration	Yes
Department of Agriculture	Yes
Department of Veteran Affairs	Yes
Department of Interior	
Bureau of Land Management	Yes
National Park Service	Yes
Bureau of Reclamation	Yes
Bureau of Indian Affairs	No
Fish and Wildlife Service	No
United States Geological Survey	No
Department of Defense	No
Department of Energy	No
National Aeronautics and Space Administration	No
Department of Homeland Security	No

## Question 16 – National Security Implications to the Public Disclosure of *Policies or Regulations*

- 77% of respondents answered “No” to having concerns with the public release of their agencies *policies or regulations* regarding broadband facilities
- 23%, 3 agencies, noted that there were national security implications to the release of agency policy or regulations regarding broadband facilities, specifically:
  - **BLM** law enforcement and fire personnel use the BLM's radio infrastructure in addition to its employees
  - **The U.S. Department of Veteran Affairs** has published physical security standards in the Physical Security Design Manual for improving the protection of mission critical facilities
    - Executive Order 12656
    - Public Law 107-188
    - Public Law 107-287
    - Homeland Security Presidential Directive 12 (HSPD-12), and
    - Federal Information Processing Standards 201 (FIPS-201)
  - **DHS** has a mission that requires broadband traffic to be secure to conduct operations. Having this open to the public could compromise missions & agents that conduct them

## Question 17 – National Security Concerns or Policies Prohibiting Release of *Real Property Assets*

Agency / Bureau	Explanation
Department of Interior	
Bureau of Indian Affairs	<ul style="list-style-type: none"> <li>BIA law enforcement and fire personnel, as well as other Federal agency personnel use BLM's radio infrastructure.</li> </ul>
National Park Service	<ul style="list-style-type: none"> <li>NPS real property assets include the White House, Statue of Liberty, the Arch in St Louis, and other iconic facilities.</li> </ul>
Bureau of Reclamation	<ul style="list-style-type: none"> <li>Reclamation's lands, facilities, and waterbodies contain or are adjacent to National Critical Infrastructure sites.</li> <li>Suitability is responsibility of the local Reclamation office.</li> </ul>
Fish and Wildlife Service	<ul style="list-style-type: none"> <li>Disclosure of high hazard dams would increase the threat and risk for those structures and the surrounding communities.</li> </ul>
Department of Energy	<ul style="list-style-type: none"> <li>Certain information cannot be made available to the public on real property assets due to national security concerns.</li> </ul>
Department of Defense	<ul style="list-style-type: none"> <li>DoD has strict policy regarding the release of DoD information to the general public (DODI 5230.29).</li> <li>The release of DoD real property information at the asset level, without significant and rigorous review could be harmful to national security.</li> </ul>
Department of Homeland Security	<ul style="list-style-type: none"> <li>DHS has a mission that requires broadband traffic to be secure to conduct operations. Having this open to the public could compromise missions &amp; agents that conduct them.</li> </ul>

**Subject:** Fwd: Broadband EO reporting requirements  
**Date:** Friday, May 3, 2019 4:14:12 PM

---

Hi Kelsey,

At noted during the ABI co-chair call yesterday, for awareness, I'm sharing (below) the email thread between Chris Conneeny (OGP) and Angela Donatelli (OMB), regarding the media inquiry about EO 13821 permit reporting. Chris also mentions the second request we received related the map; I have copied the original media request immediately below for your reference. I have not seen the final media response, but I will share if I receive it.

Please let me know if you have any questions or need any additional information.

Thanks,  
Jennie

On page 24 of the American Broadband Initiative Milestones Report released in February, there's this item of complementary actions:

GSA Buildings and Antenna Sites Map Revised and Re-released  
On June 7, 2018, GSA updated and re-released a map of GSA buildings and antenna sites. The map displays all GSA-owned buildings and lands where a commercial antenna installation might be sited. It also contains Agency points-of-contact and several layers of data useful to broadband deployment. For example, it offers visibility into the location of national parks, protected wilderness areas, and lands of Tribal significance.

Can you provide a copy of that map and the underlying data?

----- Forwarded message -----

Angela

GSA has prepared 2 iterations of the quarterly report as required by broadband EO. I can get you copies of those reports if you do not have

them.

GSA did receive a media inquiry and the reporter indicated if the report is not publicly available, could he get a copy through a FOIA. I am preparing a response through our press office. After discussions with management, our response will be that GSA met the EO requirements by sending it to OMB, and that it is not publicly available. We will obviously clear response with OSC and OGC.

As an FYI, the reporter also asked for a copy of the FRPP data and map. These are both publicly available and the response will direct the reporter to those web sites.

Subject: GSA's Broadband Information

Good afternoon, Karen and Kelsey.

As discussed Thursday, I am sharing the link for GSA's updated Broadband Map:

<https://pbs.maps.arcgis.com/home/webmap/viewer.html?useExisting=1>

The Broadband Map displays all GSA-owned buildings and lands where a commercial antenna installation might be sited and provides point of contact information for each location. The map also contains several layers of data that may be useful to broadband deployment, such as the location of National parks, protected wilderness areas, and lands of tribal significance. During the planning phase, this data may help to inform project siting, implementation, and scheduling decisions.

The update is available on the Federal Infrastructure Permitting site: <https://www.permits.performance.gov/tools/broadband-map>

Please let us know if you have any questions.

Thank you for the update, Tim. Much appreciated.

During my call with Karen yesterday, I asked if you could help us identify the desired data elements you'd like GSA to provide for the "preliminary inventory." Did she mention it to you? To the extent that GSA only has rooftop antennas, I don't know that we'll have as much information as DOI and USDA.

I had my team quickly pull together the attached charts so we could see which agencies really have the most building, land and structure assets. I think this is helpful as we drill down on the 7 major landholding agencies and think about our survey questions. The attached shows owned, leased and otherwise managed real property assets reported by all the CFO Act agencies for FY 2016. It covers only properties in the US and the US territories.

**Subject:** LFA Meeting Minutes, 5/17 Agenda and Materials

Good afternoon,

Attached, for your information and action, are the minutes from the May 10 LFA meeting, the agenda for the May 17 meeting, a draft of the revised work plan, and some proposed revisions to the survey questions. Please note that we will also be doing a short demo of some of the mechanisms that can be used to collect the survey information from agencies.

Those wishing to attend in person may join us at GSA Headquarters, [1800 F Street, NW, Room 4213](#).

Good afternoon,

Attached, for your information and action, are the minutes from the May 10 LFA meeting, the agenda for the May 17 meeting, a draft of the revised work plan, and some proposed revisions to the survey questions. Please note that we will also be doing a short demo of some of the mechanisms that can be used to collect the survey information from agencies.

Those wishing to attend in person may join us at GSA Headquarters, [1800 F Street, NW, Room 4213](#).

Tim

FRPP is the centralized database to which all agencies submit data. GSA has a separate system that is used to manage the day to day operations of its real property. I do not manage that system, but am aware that it captures many more data elements than are collected in the FRPP.

If you are expecting or wanting other pieces of data, that other system may be a better initial source for this pilot. Eventually though we will need to understand what other information is needed so it can be added to the FRPP.

We're scheduling a meeting with PBS and will ask about a data dictionary. You'll see that GSA does not have as much land, buildings or structures as other agencies. Moreover, GSA only has rooftop antennas.

One of the things we'd like to better understand is what makes an asset suitable for broadband infrastructure. Would every building, land and structure need to be mapped?

Thank you for the update, Tim. Much appreciated.

During my call with Karen yesterday, I asked if you could help us identify the desired data elements you'd like GSA to provide for the "preliminary inventory." Did she mention it to you? To the extent that GSA only has rooftop antennas, I don't know that we'll have as much information as DOI and USDA.

I had my team quickly pull together the attached charts so we could see which agencies really have the most building, land and structure assets. I think this is helpful as we drill down on the 7 major landholding agencies and think about our survey questions. The attached shows owned, leased and otherwise managed real property assets reported by all the CFO Act agencies for FY 2016. It covers only properties in the US and the US territories.

---

Good afternoon,

Attached for your review are the Revised Survey Questions. Please try and have revisions to me by 10 am Thursday May 24, 2018.

Those wishing to attend tomorrow's meeting in person may join us at GSA Headquarters, 1800 F Street, NW, Washington D.C. Room 4213.

Thank you

---
